

Backend AI Specialist

****Profile:****

Backend Engineer specializing in AI-driven data systems, RAG pipeline architecture, and high-performance API development. E

****Key Experience Highlights:****

- Production RAG Pipeline: Achieved sub-800ms retrieval across multi-format corpora using pgvector and Groq.
- WhatsApp AI Lifecycle: Managed full-cycle message orchestration from webhook ingestion to LLM response delivery.
- Async Document Ingestion: Implemented robust retry logic and status tracking for production-grade rate limit handling.

****Tech Focus:****

Python, FastAPI, Django, Node.js, PostgreSQL, pgvector, ChromaDB, OpenAI, LangChain, Redis, Medical AI, RAG.
